## DETAILED ACTION

## **Election/Restrictions**

1. Restriction is required under 35 U.S.C. 121 and 372. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-10, drawn to an oven.

Group II, claim(s) 11-16, drawn to a method for gravity bending.

2. The groups of inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature appears to be the combination of a plurality of heating groups and channels arranged in heat insulation to carry heat away via a heat transport medium flowing in the channels. However, this special technical feature is known in the art and therefore fails to define a contribution which both inventions make over the prior art. For example, Comperatore (US 4229201) teaches a furnace for bending glass which includes a plurality of heating groups (see 54 and 60 in Fig. 5). The walls of the Comperatore furnace are interpreted to be insulation. Comperatore is silent to the channels with coolant in the insulation, however, this feature is conventional in the art. For example, Knight (US 2654593) teaches a furnace with channels (29) carrying coolant (4:51-52) embedded in the walls and hearth. It would have been obvious to one of ordinary skill in the art at the time of the invention to incorporate the known coolant circulating system of Knight to the Comperatore for the following reasons: (a) to recover heat that would otherwise be lost, thereby increasing the

Art Unit: 1741

efficiency of the system, or (b) the Knight coolant system would more rapidly cool the furnace to room temperature, allowing for faster maintenance and operation.

Page 3

- 3. Applicant is advised that the reply to this requirement to be complete <u>must</u> include (i) an election of a invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.
- 4. The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.
- 5. Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
- 6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. A telephone call was made to Browdy and Neimark, P.L.L.C. on February 1, 2011, but did not result in an election being made.

## Conclusion

Any inquiry concerning this communication should be directed to MATTHEW J. DANIELS at telephone number (571) 272-2450.
